

VERSION WITH MARKINGS TO SHOW CHANGES MADE

4. (Amended) A preparation which contains cell extract for cell-free protein synthesis according to [any one of] Claim 1, [2 or 3] wherein the inhibition of the own reaction of protein synthesis excluding the systems serves as controlling deadenation of ribosome.

7. (Amended) A preparation which contains cell extract for cell-free protein synthesis according to [any one of Claims] claim 1 [- 6], characterized by formulating a substance containing cell extract for cell-free protein synthesis into a preparation which can be stored in room temperature and which maintains biological functions of said cell extract.

12. (Amended) The means for cell-free protein synthesis according to claim 10 [or 11], wherein the synthesis is continuous, and implements are selected from addition, storage, exchange and discharge, regarding a factor chosen from at least mRNA, a template for synthesis reaction, enzyme for energy recycling system, substrate, and energy source.
